

Shivam Prakash

Web Developer | Data Analyst

shivampr1709@gmail.com | +91 8210020105 | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

MCA student specializing in Frontend Web Development and Data Analytics, with hands-on experience building responsive web applications, interactive dashboards, and full-stack data-driven platforms. Proficient in HTML5, CSS3, JavaScript, Python, and Flask for web development, and SQL, Power BI, Tableau, and Chart.js for data analysis and visualization. Skilled at translating raw data into clear, actionable insights. Strong analytical thinking and problem-solving ability, seeking to contribute as a Web Developer or Data Analyst.

SKILLS

- | | | | |
|----------------------|--------------------|------------------------|----------------------|
| • HTML5 | • CSS3 | • JavaScript | • Python |
| • Flask | • Data Analysis | • REST API Integration | • SQL |
| • Pandas | • Bootstrap | • JSON | • Git/GitHub |
| • Power BI | • MySQL | • Tableau | • NumPy |
| • Excel/Spreadsheets | • Jupyter Notebook | • Data Visualization | • Responsive Design |
| • Database Modeling | • Data Structures | • Statistical Analysis | • Prompt Engineering |

PROJECTS

Smart Expense Analytics Platform — *Flask, Python, SQLAlchemy, JavaScript, HTML5, CSS3*

- Built a full-stack expense tracking and analytics web application using Flask and SQLAlchemy, with a relational database backend replacing client-side-only storage for persistent, multi-user data management.
- Developed interactive Chart.js dashboards displaying category-wise spending breakdowns and monthly trends to help users interpret personal finance data at a glance.
- Engineered custom Three.js 3D visualizations, including a real-time rotating spending ring rendered from live category data, for a more intuitive analytics experience.
- Designed a fully responsive, glassmorphism-styled interface with a consistent color system maintained across CSS variables and Three.js rendering constants.
- Implemented Flask routes, authentication flow, and backend analytics logic, structuring database models to support scalable reporting features.

Free Courses Hub for Students — *Flask, Python, JavaScript (Canvas API), HTML5, CSS3*

- Built a Flask-based web platform for discovering free online courses, featuring an interactive hero section with a custom Canvas API orbital visualization of course categories (Web Development, Cloud Computing, AI & ML, Cybersecurity).
- Engineered dynamic, responsive rendering logic that computes orbit radius from measured label text widths on every resize, ensuring all category nodes stay fully visible across rotation angles and screen sizes.
- Validated the implementation with automated Playwright stress tests sweeping rotation angles across multiple viewport widths under maximum mouse-parallax offset, confirming zero visual clipping.

EDUCATION

MCA (Master of Computer Applications)

Global Group of Institutes, Amritsar | Result Awaited

Aug 2024 — Jun 2026

BCA (Bachelor of Computer Applications)

Gaya College, Gaya | Percentage: 69.6%

Jan 2020 — Mar 2024

CERTIFICATIONS

- Web Development — Excellence Technology, 2025
- Data Analytics — Cisco Networking Academy ([verify](#))
- Responsive Web Design — freeCodeCamp ([verify](#))
- Google Data Analysis with Python (Specialization) — Google | Coursera ([verify](#))
- Foundations of Prompt Engineering — AWS Skill Builder
- Data Analytics Job Simulation — Deloitte (via Forage) ([verify](#))
