PROJECT EXPERIENCE

Smart Expense Analytics Platform

Aug 2024 — Present

Flask · Python · SQLAlchemy · JavaScript · Chart.js · Three.js · HTML5 · CSS3 · Agile

- Built full-stack expense tracker using Flask and SQLAlchemy with user authentication, persistent storage, and multi-category transaction management.
- Built interactive Chart.js dashboards to visualize monthly and category-wise spending trends, enabling faster financial analysis.
- Developed Three.js 3D spending-ring driven by live DB queries, improving data interpretability for non-technical users.

Free Courses Hub for Students

Mar 2025 — Jun 2025

Flask · Python · JavaScript (Canvas API) · HTML5 · CSS3 · CI/CD (Playwright)

- Built Flask course discovery platform aggregating 50+ free resources across 4 domains: Web Dev, Cloud Computing, AI/ML, Cybersecurity.
- Diagnosed Canvas API label-clipping bug where orbital animation nodes disappeared at certain rotation angles on smaller screen widths.
- Fixed the bug by computing orbit radius dynamically via `ctx.measureText()` to account for actual rendered label widths on every viewport resize.
